

Compassionate Communities

We'd like to hear what members of communities in Wheatland County want to say about palliative and end of life care. It is our hope that through listening to what you have to say we can enhance community supports for palliative and end of life care.

The **Wheatland & Area Hospice Society, Alberta Health Services and the Cumming School of Medicine** have partnered with the common goal of engaging with communities to enhance palliative and end of life care supports. We are hosting a series of **“Community Conversations” Focus Groups** throughout the Wheatland Area. These conversations will help us identify what community members deem as important areas surrounding palliative and end of life care and how to better support their community. At the end of this process a report will be created that will identify future action areas.
